We bring everything needed for student labs which focus on:

- Ocean currents
- Density
- Salinity
- Temperature
- Erosion

Students work together in groups on a specific lab and present their findings to the class. This hands-on science program is a perfect pre or post trip activity for a beach or boat program.

Program Logistics:

- All purpose room or classroom with 4 large tables or desks arranged to create 4 work stations
- Access to a deep sink with cold water
- If the same room is unavailable for the full day, provide a rolling cart and avoid stairs between sessions
- A black or white board
- Allot 30 minutes between sessions
- Labs and pre and post trip activities are sent prior to the program.
