

How will this work?

Ignite Sessions

Four different topics will be shared with the group. Based on the topic that pertains the most to you, you can select which table to go to for our breakout sessions.

Breakout Session Tables

- Go where you want and move around when you want to.
- Lead the conversation, participate, or just listen.
- Check out the <u>session</u> <u>notes</u> afterward if you couldn't get to every table that you were interested in!

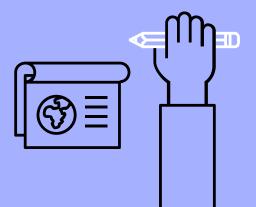

Table Topics

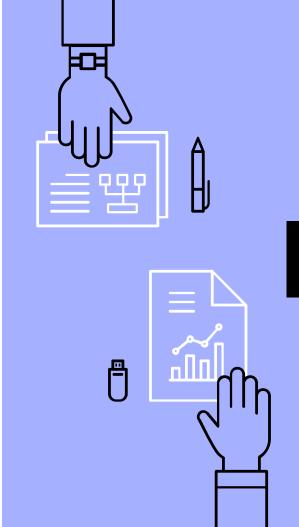

- DistrictSupport/Admin
- ▶ Technical
- Instructional Tech
- ▶ EdTech Tools

What is Padlet?

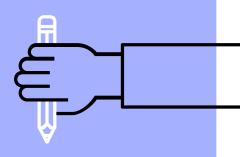

- Idea-generating board
- Will be used to share topics that you are willing to lead a table conversation on OR to request a topic for discussion

District Support/Admin

Preventing and Managing
Data Breaches

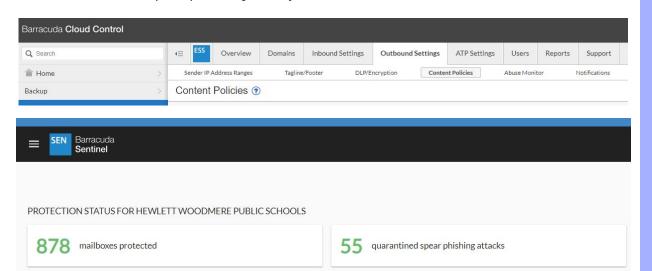

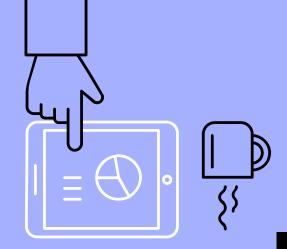

Protecting District Data

Preventing

- Data privacy and security service
- MS-ISAC
- 2-factor of multi-factor authentication for admin/IT
- Simulated phishing emails to staff (<u>KnowBe4</u>)
- Digital privacy and security training for staff
- Change of practices (encrypted file transfer)
- Data loss prevention, Email Gateway (<u>Barracuda Essentials</u>)
- Real-time spear phishing and cyber fraud defense (Barracuda Sentinel)

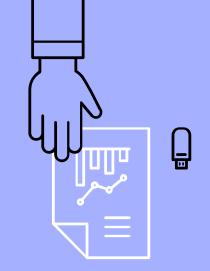

Managing a Data Breach

- 1. Change the user password
- 2. Kill all active sessions: <u>session token revocation</u>
- 3. Look for email rules that had been created (if email breach)
- 4. Check 365 logs (make sure to enable detailed audit logs in 365 for users who transmit sensitive information)
- 5. Utilize a syslog server (Kiwi by Solarwinds): collect, filter, alert, forward and store log messages OR if this is not in place, check logs of all systems that may have been compromised to determine the extent of the data (remote access, SIS, etc)
- 6. Review your District Breach Notification Policy
- 7. Notify the appropriate individuals (FERPA, 208 violations)

*Make your superintendent aware and consult with your legal team. In most instances, depending on the type of data compromised, you will need to report the incident to

- New York State Office of Information Technology Services
- New York State Attorney General's Office
- New York State Department of State, Division of Consumer Protection

When in doubt...

Louis Smith: GPEN, ACE, CCPA, CCO

Senior Security Analyst
Cyber Security Operations
NYS Cyber Command Center
Enterprise Information Security Office

NYS Office of Information Technology Services

CNSE ZEN Bldg., Room 205, 201 Fuller Road, Albany, NY 12203

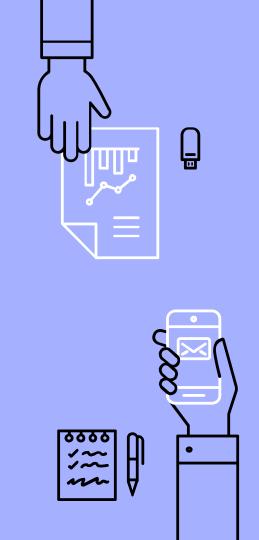

Louis.Smith@its.ny.gov

Cyber Command Center Hotline: (518) 242-5045

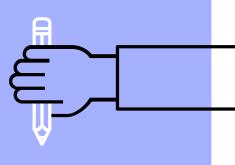

www.its.ny.gov

NYS CYCOM can assist in:

- Malware and log analysis
- Incident response assistance
- Business email compromise remediation efforts
- Digital forensics

Instructional Technology

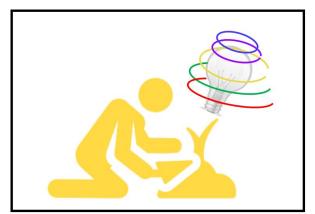

GROWING SUSTAINABLE REDEFINITION: INTERNAL INNOVATION GRANTS

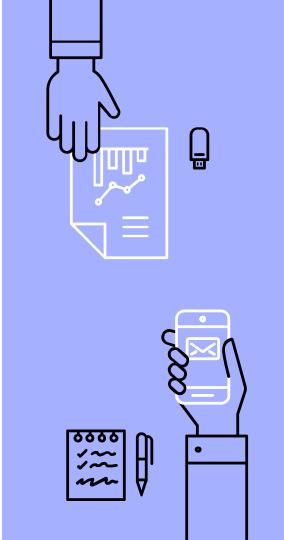

INNOVATION

Tech Table

Going cloud-based with 365

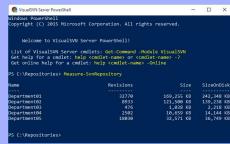

No ability to force password reset
via email login
Many steps involved in creating
accounts, including having to
assign licenses.

Inability to turn off some features. Less of a GUI interface – more need for PowerShell.
