

Nassau BOCES *parentEDU* offers a variety of classes designed to provide parents/guardians an opportunity to learn strategies to help their students achieve success during their remote learning experience.

These virtual classes will be interactive and taught live by Nassau BOCES Curriculum Specialists and professional consultants. All classes will include time for the instructor to respond to questions from the participants. Additional topics will be added to the class catalog based on parent input.

Recordings of all sessions will be made available for unlimited access on the *parentEDU* webpage.

Select Classes On A Variety Of Topics Include:

Explaining the “New” Math for Parents of Students Grades 3-5

This class will show parents how the area model and number bonds are used to teach multiplication and division conceptually to children. Learn why learning this way better prepares your child for success in math during the later years.

How to Support Your Child with Their Writing for Parents of Students Grades 3-8

This class speaks with parents about ways to help their young writers. We will discuss different writing styles and how to help your student include important writing strategies.

How to Conduct Science Observations at Home for Parents of Students Grades 4-12

This class teaches parents how to organize a structured scientific observation in their own home or yard; learning the basics appreciating nature as young scientists and naturalists.

Learn Routines to Make Learning from Home More Manageable for Parents of Students Grades K-12

This class will give parents ideas and tips for setting consistent school routines and helping students manage their time, which will lead to greater independence with their schoolwork.

Pricing:
Annual fee - \$2,750

Includes unlimited all-access admission for every parent in your district to:

- ▶ the entire live class catalog with updated programing as new topics are added
- ▶ all recorded classes on *parentEDU* webpage

**Bilingual options coming soon*
