CLASSROOM Application: FlipQuiz is a quick, easy and efficient way to play jeopardy-like games. Simply sign in and begin searching or creating your own game board. The formatting is already generated so all you have to do is enter the questions and the answers. Each board can have up to six categories with up to five questions with pictures as part of the question and/or answer. A timer can be set so that the question disappears when the allotted times up and the question point values will disappear once that question is asked. When the game is done being created, just click present and it is ready to play with your class. At any point the game can be restarted so it is easy to play multiple times during the day. Games can be exported as CSV, Word files, they can be printed, and they can be shared via link or QR Code so students can study from them at home as well as in class. Additionally, there is the paid FlipQuiz Pro or Pro Teams options which allows for in-game scorekeeping, digital flash cards, copy others' boards, upload images, make your boards private and have custom point values.

Compatibility: FlipQuiz is available Chrome 35, Firefox 35, Safari 9, Internet Explorer 11, Microsoft Edge 12.
